## Career Objective

To gain hands-on experience in software development by contributing to real-world projects. I aim to work in a collaborative environment where I can learn, grow, and enhance my programming skills.

## Skills

**Frontend:** HTML, CSS, JavaScript

**Backend:** Python, Java, MySQL

**Other:** Git/GitHub, Data Structures & Algorithms, API Integration

## Projects

**Weather Forecast Website** – Built with HTML, CSS, and JavaScript; integrated OpenWeather API for live weather updates.

**Student Management System** – Developed using Python and MySQL with full CRUD operations for managing student records.

**Personal Portfolio Website** – Responsive design using HTML, CSS, and JavaScript; hosted on GitHub Pages with a downloadable resume feature.

## Certificates

Full Stack Software Development (IBM)

Git & GitHub Essentials

Databases and SQL for Data Science with Python (IBM)

## Strengths

Quick learner, eager to explore new technologies

Comfortable using AI tools and online resources

Consistent in completing tasks on time

Strong conceptual understanding with practical application
